Hello Jim,

As we have discussed, it is perfectly acceptable to pack the DOLPHIN reserve container using the same closing sequence as the JAVELIN. During the testing of the DOLPHIN we packed the reserve containers with the top and bottom flaps over the pilot chute, and with only the top flap over the pilot chute; and there was no discernible difference in the deployments with either pack method. I hope this information will be helpful to you, if you need any more, we will be happy to provide what we can.

Thanx & Best Regards,
Mike Furry

Hi Mike Furry.
Jim Moore here.

Dolphin manual attached.
The student version to follow tomorrow.

I have lost/ misplaced my copy of the alternate packing method. The one that permits 'left - right - pilot chute - bottom - top' in lew of 'left - right - bottom - pilot chute - top'. Could you please send me copy? (fax or email is fine but if fax call ahead to 270 723 3587 so I can get 270 932 4339 ready to receive a fax).

Sweet Swoops.
